Tuesday, Dec. 29-F. M.

The stock market continued to show the same dullness as yesterday at the morning Board, and the tendency generally was to lower prices. The parties operating for a fall offered to sell more boldly, but were not able to put out a large amount of contracts. Central and Erie were offered freely on seller's options. The demand for cash stock was mainly to fill contracts, there being still a very limited amount of outside or-ders. The bulls do not appear to be disposed to act with any energy, bidding apparently only when neces-sary to sustain the market. The sales of Rock Island ere larger than usual, and the price fell off to 70. There are two or three rumors in regard to the reason for the recent fall in this stock, but nothing authentic, The price afterward recovered to 714, and closed at 711. Galena is very heavy, and sold down to 691, probably under the doubt in regard to the February dividend. The market afterward recovered to 70]. Reading was heavy in the morning, and cash stock was more plenty, some transfers having been made from Philadelphia. Central opened at 731 and sold down to 731. Pacific Steamship Company was heavy at 65 2651, although it is said to have an accumulation of \$600,000, and there is the probability of an early extra dividend. Panama is 94; the dividend, we believe is certain. At the Second Board the transactions were moderate, but prices were stronger; and after the Board there was a rally of 1 #1 P cent, which, however, was not fully maintained at the close. The operators for a rise took advantage of the buoyant feeling to bid the market up. At the close Eric was 171 a 171; Central, 731 274; Rock Island, 711 271; Reading, 541 2541, having been 541, an improvement of 1 F cent. This improvement in the stock took place while the new bonds were lower, selling at 65. Southern closed at 19, &c. The bond sales were moderate, and generally without important change. A small sale of United States 6s was made at 112. Bank stocks were not active but firm.

The mail for this steamer is a very light one, and the bills which have been sold, excepting in the case of two or three favorite signatures, have been at lower figures. These signatures have been taken at 109} for Sterling, but first-class Sterling has been sold as low as 108, and France as low as 5.284. The supply of bills is large and increasing under the Cotton move-

ment, and low figures are anticipated.

Freights are heavy, and for Liverpool the engagements are 1,000 bbls. Flour at 2s.; 22,000 bush. Grain at 54d. in bulk, and 6d. in bags; Cotton at 5-32d.; 100 boxes Bacon at 20s.; 500 tes. The amount of gold sent to Boston to-day for the

steamer is about \$550,000. The shippers are, Bel-mont, \$200,000; J. & J. Stuart, \$100,000; Duncan, Sherman & Co., \$100,000, &c. The shipments by the Persia promises to be very large.

Treasury notes have been very small to-day. Many parties are considering the matter, but the progress o the exchange is, as yet, not satisfactory. There will probably be changes among the officers of some of the banks on or soon after the 1st prox., but

the arrangements are not yet complete. The Cotton market is inactive and very heavy. Forced sales of Middling have been made as low as 9c. The receipts here are becoming important. There is but little demand for shipment or consumption. The sales since the 22d have been 1,500 bales. Arrivals, 6,000 bales; exports, 287 bales; stock, 10,000 bales. These are 105 vessels loading in the United States for Great Britain and France, against 148 same time last year. The decrease is nearly all in vessels loading for Great Britain. Southern markets are all lower, with a fair amount of business in each, chiefly for France and the Continent. A further reduction at all points was submitted to after receipt of the Adriatic's advices, and a still further decline took place upon re-ceipt of those per Persia.  The Circular of Mr. Wright gives the annexed:

The Circular of Mr. Wright gives the annexed:

CNOF —The reports from the South, received here during the
past week, are mestly in favor of the reduced figures given in my
last weekly circular. The estimates vary from 3,000,000 to 3,100,
-000 bales. I give these figures as the prevailing opinion in the
South, but without indorsing them.

Receipts at the ports are still below the corresponding week of
last year, being 117,000 bales against 134,000 same week last year.

The total deficit is 383,000 bales, and it will be increased next
week, as we have to compare with the largest week of the whole
of last year, my 149,000 bales. The deficit will be robusty reach its
maximum by my tables of the 3d week in January, after which
it will be reduced, as there was a gradual falling off in the weekly
its receipt seed that period last year. An impression prevails that
the recent declined, as there was a gradual falling off in the weekly
falling off in receipts very shortly. Should this prove correct, it
will be at variance with former experience, and will not continue
for any considerable period.

The Philadelphia Press states that the banks of that city have unanimously agreed to make up and publish particular day of the week, to be hereafter specified. At the meeting of the bondholders of the Vermont Valley Railroad, at Bellows Falls, last week, the act of the last Legislature, entitled "An Act relating to Trustees of Railroads," was accepted, and H. H. Henry, Governeur Morris and Alexander Hamilton, jr., of New-York, Madison Sloat and Daniel Kellogg were

elected Trustees. The earnings of the Ogdensburg Railroad for the

vear was as follows: 

The Boston Traveler says: "The result of the meeting this week at Ogdensburg will probably be the formation of a new corporation converting the second bonds into stock, calling the bonds 50 \( \Psi \) cent, thereby reducing the amount on which they are liable for interest, and give the stockholders under the new administration a chance to re-

ceive something." The bonds of Bridgeport, Conn., amounting to \$150,000, became payable on the 15th December. Not having funds for their redemption, they issued new bonds for the same amount. The whole amount was sold, and the agents have taken up \$134,000 of the amount due, and have in hand \$16,000 in cash for the balance outstanding. The new bonds are to run
